

ABOUT ME

I am a senior at Pacific Lutheran University in Tacoma, Washington. From an early age I developed a passion for electronics and computer coding. What interests me most is understanding the components of a product and learning how its vulnerabilities and strengths impact the way a product works.

Skills

Java Programming

Website Developer

Embedded Electronics Programming

Customer Service

Animatronic Wiring and Programming

YouTube Content Creator

Eric Golde

Work Experience

MyHauntedForest (2020 – Present)

Developed, designed, and tested animatronics for use in this outdoor haunted attraction. Created custom software and hardware for animatronics and visual effects. Interacted with customers throughout the attraction. On the off season, I help plan for next season, as well as year-round management of all IT systems on and off property.

Pluggable Technologies (Summer 2019)

Testing and development of software and hardware; warehouse operations.

Volunteer Work (2015 – Present)

Hamlin Robinson, where I attended middle school, holds a special place in my heart. I volunteer every summer to teach computer programming and robotics classes to kids who struggle with dyslexia and dysgraphia. I also DJ for their middle school dance every winter.

Education

Pacific Lutheran University (2019 – Present)

BA Computer Science

GPA: 3.4

Seattle Academy of Arts and Sciences (2015 – 2019)
